.....
National Highways Sector Scheme, NHSS30 – ‘The Quality Management of the Installation, Maintenance and Repair of Modular Paving’, seeks to improve the installed quality of all types of modular paving including Blocks, Pavers, Setts, Kerbs and Slabs in concrete, clay or natural stone by providing an industry benchmark, ensuring project processes are planned, use properly trained and competent installers. The scheme focuses on continuous improvement, quality of installation and reduced ongoing costs for both the client and supplier.

Sessions will highlight the benefits of NHSS30 as well as Highways Sector Schemes in general; giving details of the training requirements for operatives and supervisors and necessary quality scheme activities for contractors large and small and will detail a training manual which will be available free to attendees.

Southwark Council’s offices at 160 Tooley Street are located in the north of the borough at the Tower Bridge end of Tooley Street, opposite the Unicorn Theatre in London. It is served by excellent bus, rail and underground links.

We look forward to welcoming you to the event.
